DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Elmore. Element 10 is readable on the hollow socket that fits over the valve body 26 or valve member 12. Faces 44 and 48 are readable on the pair of opposed shoulders of the valve 12 and elements 58 are readable on the opposed bearing surfaces of the socket. The turning engagement means is readable on element 70 and the turning means is readable on the wrench 24. Note that the pressurized pipeline of Elmore is readable on the claimed pressure tank.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
